

Name: _____

Proving that a point is a solution

Prove that the ordered pair $(1, 2)$ is a solution, using two methods.

$y = 4x - 2$	$y = 3x - 1$
--------------	--------------

Prove that the ordered pair $(8, 7)$ is a solution, using two methods.

$y = \frac{1}{2}x + 3$	$x - 2y = -6$
------------------------	---------------
